I was so frustrated with not getting the body I wanted. It wasn't until I found Venus Factor that I finally reshaped my body. I wasn't very skeptical, which probably helped me to get started with the workouts, but there wasn't really anything to worry about anyway. I just did three months as a test drive and the results blew me away, I completely changed my body and my whole life.

After doing the Venus program I realized that before I was doing almost everything wrong and way too complicated.

**I'm 50 and I'm in the leanness and best shape of my life. I' so happy, I have never been happier.**

I am so grateful to John who is an amazing guy by the way, he's the type of trainer that a trainer like me looks up to. It's important to understand that a complete program like this one is very hard to find and making things easier to do is essential for success when you're too busy with your own life, let professionals like John, Brad and his team (yes their team because they are also FANTASTIC responding practically within the hour for any inquiries) ENSURE you have ALL the tools you need to reach the BEST SHAPE you have ever been in your entire life and your only responsibility is commit to **JUST DO IT no excuses**, not with a program like Venus Factor that works no questions asked as long as you do it.
